

MARATHON DAY II

Date _____

Marketplace Builder

General E-commerce

Step 1:

Primary Purpose:

To develop an intuitive online platform that provides ready-made clothing for a diverse range of customers, including men, women, boys, girls and children - the focus will be on offering high-quality, affordable apparel with an emphasis on convenience, variety, and outstanding customer service.

Unique Selling Point:

The platform will feature AI-driven product recommendations and curated collections customized to customer preferences, enhancing the shopping experience by making it more personalized and convenient.

Step 2:

Set Your Business Goals:

1. What problem does your marketplace aim to solve?

- Eliminate the difficulty of shopping for ready-made clothing across multiple stores by providing a unified online solution.
- Offer a smooth, enjoyable shopping experience with simple navigation and personalized product recommendations.

2. Who is your target audience?

- Primary Audience: Families and individuals looking for ready-made clothing for people of all ages and occasions.
- Secondary Audience: Price-conscious consumers and fashion-forward individuals seeking trendy yet affordable apparel.

3. What products or services will you offer?

• Products:

- Ready-made clothing for men, women, boys, girls and children.
- Fashion accessories, such as belts, scarves, hats and ties.

• Services:

- AI-Powered Recommendations: Personalized product suggestions based on browsing and purchase history.
- Loyalty Program: A points-based reward system for repeat customers, encouraging continued business.
- Easy Return and Flexible Payment Options: Making the shopping experience more convenient and trustworthy.

4. What will set your marketplace apart?

- Curated Collections: Feature seasonal, festive, and affordable clothing selections to help customers make decisions more easily.
- Efficient Shipping: Ensure prompt delivery with real-time order tracking.
- Sustainability Commitment: Use eco-friendly packaging and promote ethical brands, appealing to environmentally conscious customers.

Step 3 :

Create a Data Schema Entities and Attributes:

• Products:

- Product ID .
- Name .
- Description .
- Price .
- Stock Level .
- Category (e.g., Men, Women, Kids)
- Sub-category (e.g., Casual, Formal, Accessories)
- Sizes (S, M, L, XL, etc.) .
- Images .
- Tags (e.g., "New Arrival", "On Sale") .

• Orders:

- Order ID .
- Customer ID .
- Product List (Product ID, Quantity) .
- Total Price .
- Order Status (Pending, Shipped, Delivered)
- Payment Method .
- Timestamps (Order Date, Expected Delivery Date) .

• Customers:

- Customer ID .
- Name .
- Email .
- Address .

- Contact Number

- Order History

- Preferences (e.g., preferred sizes, styles)

- Shipments:

- Shipment ID

- Order ID

- Delivery Address

- Shipment Status

- Courier Partner

- Expected Delivery Date

- Delivery Zones:

- Zone ID

- Area Name

- Coverage (Cities or Regions)

- Loyalty Points (New Entity):

- Points ID

- Customer ID

- Points Earned

- Points Redeemed

- Expiry Date
